Non-Rotated

Rotated

After Rotation we have the above 2 conditions,

- If  $mid < start$  case ①
  - if  $target \geq mid$  and  $target \leq end$   
 $mid += 1$
  - else  $end = mid - 1$
- else case ②
  - if  $target \geq start$  and  $target < mid$   
 $end = mid - 1$
  - else  $start = mid + 1$
